130 Winthrop Ave,
Crawley WA 6009

SKILLS

- * Programming Languages: C/C++, Python, Java, Bash, DSA.
- * Web Technologies: HTML, CSS, JavaScript, TypeScript, PHP.
- * Database Management: SQL, SPARQL.
- * Frameworks: Django, Flask, React.

CERTIFICATION

Microsoft Technology Associate (MTA) – Introduction to Programming using JavaScript
Certificate Number: wAhHC-2Fwb

PROJECTS

- * Health Condition Predicting Model:
Led a team to develop a health prediction model using HTML, CSS, JS, Python, and ML algorithms.

* CollegeBro App

- Designed and developed a website providing educational resources using HTML, CSS, Js, PHP, and SQL.

- Created an APK version using Cordova.

https://github.com/Manishv005/College_Bro_APK.git

* Smart Door Lock System

- Developed a smartphone-controlled, internet-connected deadbolt actuator using a Raspberry Pi, high torque servo, and Blynk app.
- Implemented features like LED lock status indicator and manual override button.
- Designed 3D printed components for easy installation and customization.

* Agile Web Development Project

- Collaborated on a web development project using Agile methodologies, focusing on iterative development and client feedback.
- Utilized HTML, CSS, JavaScript, and backend technologies to create a dynamic web application.
- Implemented database integration for user authentication and data management.

PROJECT NAME : PuzzleMe Application

- Developed an online platform for creating, searching, and playing puzzles using HTML5, CSS, Bootstrap, jQuery, AJAX, Flask, Websockets, and SQLite (via SQLAlchemy).

- *
 - Implemented user management features such as signup, login, logout, and profile editing.
 - Enabled users to create and search puzzles, with gameplay involving guessing letters to solve puzzles.
 - Developed a leaderboard to display top players based on their scores and ranks.
 - Used Pytest and Selenium for unit testing, ensuring the reliability and correctness of the codebase.

- *
 Interactive Visualization Tool for ISO 15926-4 Hierarchical Data for (NLP-TLP UWA GROUP)
 Contributed significantly to the development of an interactive visualization tool for exploring hierarchical relationships using Streamlit, NetworkX, and D3.js.
 Key contributions included:
 - GUI Design and Webpage Layout: Designed the complete graphical user interface, integrating the client's logo and structuring the webpage for intuitive navigation.
 - Enhanced Search Functionality: Developed advanced search features, including search by name, adjustable parent/child node levels, and auto-fill suggestions.
 - Graph Interaction and Visualization: Implemented color-coded nodes, corrected arrow direction, and ensured hierarchical flows were clearly visualized. Added functionality for switching between plot types and optimized plot dimensions.
 - Hierarchical Tree Visualization: Created a D3 tree structure to visualize entire hierarchies dynamically.
 - User-Centric Enhancements: Improved user experience with interactive features like node clicking, hovering, and dragging, along with clear visual indicators for easier comprehension of complex data.

- *
 - Technologies used: **Streamlit, NetworkX, D3.js, SPARQL**<https://github.com/nlp-tlp/15926-4-CITS5206-18.git>

EDUCATION

Master of Information Technology	2023-2024
University of Western Australia, Perth	GPA : 5.1 out of 7
Bachelor of Engineering in Information Science and Engineering	2017-2021
Sambhram Institute of Technology, Bangalore	CGPA: 7.69
12th Grade , PRE-UNIVERSITY (PCMC)	2015-2017
Reva Independent PU College, Bangalore	Percentage: 70.66%
Grade 10th, Board-ICSE	2015
Ryan International School, Bangalore	Percentage: 76%

EXPERIENCE

- Intern, Python-based ERP Modules and Web Technologies**
- * Prime Minds, Bangalore
(Jan 2020 – Apr 2020)
 - Developed ERP lifecycle modules including invoice generation and inventory management using ODOO.
 - Created a website for user login data storage and validation.
